

DECORATIVE WATER-BASED INTERIOR PRODUCT GROUP

Tempo Universal Primer

PRODUCT DESCRIPTION

Acrylic copolymer-based, white-pigmented primer. High coverage and adherence.

FEATURES

Improves adherence by playing a binding bridge role between the paint and the surface. Reduces paint consumption and saves time by preventing over absorption of the top coat paint by the surface.

APPLICATION SURFACES

Applied as a primer on interior or exterior raw plastered surfaces, concrete, exposed concrete, MDF, precast concrete panel, OSB, brick, paste and surfaces which will be painted for the first time and faded previously painted surfaces or which are desired to be changed for decorative purposes.

APPLICATION

Application surfaces should be smooth, dry, clean, solid, and able to bear the paint. Remove any dirt, dust, mold grease and loose layers from the application surface, perform required surface corrections and prime with Tempo Universal Primer. Comply with defined setting periods on concrete, exposed concrete and new plastered surfaces (28 days). Ensure that ambient and surface temperatures are between +5 °C and 30 °C during application. Apply using a brush, roller or spray gun. Our products should be applied on substructure surfaces that are built in line with 30.06.2007 dated General Construction Specifications No. 26568.
